# ABOUT Stickydata

Stickydata was created to solve the frustration of managing an ATM Fleet. These fleets are large and cross state sometimes country borders. No longer can they be managed ad hoc. With the consolidation of banking, fewer people are there to manage a more complex and compliant driven segment. Stickydata is there to make it simpler, faster, and save the data for the future.

Stickydata also provides ATM site evaluations, ADA compliance, & Site Surveys. All managed through our powerful and user-friendly dashboard platform called Stickydata.

# FULL SERVICE ATM FLEET MANAGEMENT

- **Certified & Trained Technicians**
- **Peace of Mind**
- **Thorough Data Integrity & Review Process**
- **Full Access to Exclusive Stickydata Tools**
- **Data & Photos of Your ATM Fleet**

# ADA COMPLIANCE

## Is your ATM accessible and ADA compliant?

### ADA Compliance and Accessibility

Ramps, doorways, tactile buttons, audio assistance, height and reach and more. Features required by the ADA Standards for Accessible Design are evaluated, photographed and reported in Stickydata making network wide ADA compliance management consistent, auditable and easy.

### Become Compliant

Are you...or are you not? When it comes to being compliant we understand that the only answer to this question should be YES. The Department of Justice has established guidelines and when you partner with ATA Services we ensure that all of your ATMs meet these guidelines. You can manage all of your compliant issues in Stickydata which allows you to effectively identify those issues and begin the process of Becoming ADA Compliant.

### ADA Reference Library

Do you know what the ADA Compliance codes are for each state? When you partner with Burroughs you get access to our ADA Compliance Library showing you the exact qualifications for each state to help you stay in compliance.

# SITE SURVEYS

We Provide Detailed Lighting,  
Safety, & Installation Surveys.

## SAFETY SURVEYS

Stickydata provides safety surveys at your ATMs  
& Branches with regular checkups.

## LIGHTING SURVEYS

Stickydata provides lighting & Nighttime lighting surveys  
at your ATMs & Branches.

## INSTALLATION SURVEYS

You can count on Stickydata to provide detailed  
pre & post installation surveys.

# SAFETY SURVEYS

Stickydata provides safety surveys with regular checkups. Mirrors, cameras and landscaping components in the ATM environment are checked. Have seasonal changes affected landscaping? Detailed reports contain photos that show all angles and areas of concern.

**SAFETY**  
**Passed**

**Reasons:**

Is there a security notice posted near the ATM?  
**YES**

Is there overgrown landscaping near the ATM or ATM entrance?  
**NO**

Are mirrors installed on the ATM?  
**YES**

Are there surveillance cameras monitoring the ATM area?  
**YES**

**PHOTOGRAPHS WALL LABEL AREA**

**RECEIPT**

**ATM**

**SURVEILLANCE CAMERA**

**SAFETY MEASUREMENTS**

**PASSED**

# LIGHTING SURVEYS

**FAILED**

**LIGHTING**  
**Failed**

**Reasons:**

- The Illumination at or within 50 feet of the ATM or ATM entrance is less than 2 foot candles.
- The Illumination at or within 50 feet of the ATM or ATM entrance is less than 2 foot candles.
- The Illumination at or within 50 feet of the ATM or ATM entrance is less than 2 foot candles.
- Within the parking area the Illumination at or within 60 feet of the ATM or ATM entrance is less than 1 foot candles.

**Lighting Not Working**

Item No.	Type
1	Street Light

**Lighting Replacement: None**

Replaces (LPH) non-regulated Lighting Fixtures as Part of this Survey

**Light Meter Assort**

**Lighting Diagram**

All ATM area lighting is checked for proper functionality. Deficiencies are identified, photographed and everything uploads seamlessly into Stickydata for easy management.

Illumination values determined from the ATM face to 60' out in all directions using calibrated light meters. Non-working light fixtures are documented. Site diagrams, overview drawings and comprehensive photos show problem areas and contextualize the data. The report is simple and concise, clearly highlighting deficiencies.

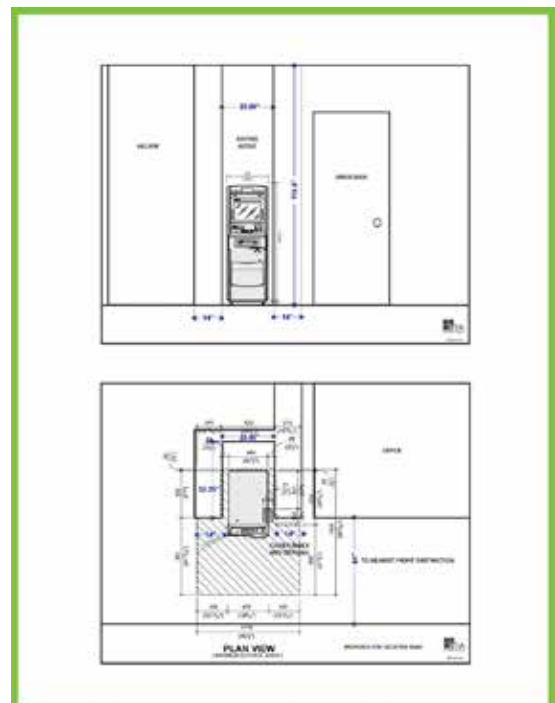

# INSTALLATION SURVEYS

## PRE-INSTALLATION SURVEYS

The proposed site is evaluated for the installation. Dimensioned drawings are completed and scale drawings augment comprehensive photos and survey questions. A rendering of the new ATM and branding element are created to visualize the proposed installation.

## POST-INSTALLATION SURVEYS

The new installation is evaluated for ADA accessibility. Installation contractor work is photographed and documented to ensure quality workmanship and compliance with work orders. All data and photos are integrated into Stickydata.
